

GENERAL CHARACTERISTICS

The visual level indicators ILC series are used to visually monitor the status of the level of liquids in tanks.

The indicators are mounted outside the tank by means of threaded connections. The system thus designed (double vision pipe) allows the vision of the level inside the tank at 360°.

- Double pipe rugged construction.
- Pipe made of acrylic material and unbreakable.
- Easy to install.

		Code
Connections	Anodized aluminium	D
Vision pipe	Methacrylate	PX
Protection pipe	Methacrylate	
Fittings	Nickel plated brass	B
Sealing OR	NBR	-

DIMENSIONS

INSTALLATION

The indicator is equipped with mobile terminals that allow to recover the distance errors of the mounting holes up to 4 mm.

Standard uses:

H₂O, glycol, gasoline, hydrocarbons, mineral oils, vegetable oils, diesel fuel, ethanol 20%.
